About me

I'm a Fullstack Developer with a background in accounting and business systems. I build web applications using JavaScript, React, Node.js, and MongoDB, and I'm currently in my third year of university studies in Accounting, alongside studies in Management Information Systems. My experience blends technical development with analytical thinking, supported by a strong foundation in financial logic and structured problem-solving. I enjoy working in organized teams, solving problems with precision, and learning new tools and languages. I'm open to international opportunities and passionate about sustainability, communication, and continuous improvement.

Work experience _____**Web application developer** | 01/10/2023 - Current | gabes, Tunisia

Multidisciplinary fullstack developer with a solid foundation in JavaScript, React, Node.js, and Next.js, blending technical precision with business insight. I design responsive user interfaces, build secure and scalable backend systems, and streamline deployment workflows using modern tools and platforms. My background in accounting and IT management adds analytical depth and structured thinking to my development process, while my ability to communicate clearly in multiple languages ensures effective collaboration and documentation across diverse teams

Customer service representative(intership) | banque de tunisie | 01/07/2025 - 31/08/2025 | gabes, Tunisia

Assisted in preparing and organizing loan application files, ensuring all required documents were complete and compliant.

- Helped explain loan conditions and repayment terms to clients under supervision.
- Followed up on pending loan requests and updated internal records accordingly.
- Observed the evaluation process of client eligibility based on financial and administrative criteria.
- Supported the team in handling customer inquiries related to personal and housing loans

Certifications _____**Responsive Web Design** | freeCodeCamp | online | 30/06/2025

Formation complète offerte par freeCodeCamp, couvrant les bases du design web, HTML, CSS, Flexbox, Grid, et les principes de conception responsive. Certificat obtenu après plus de 300 heures de pratique et de projets validés
